## SUMMARY

IT Support professional with 1+ year of experience in a higher education environment, serving as a first point of contact for students, faculty, and staff. CompTIA Network+ certified and bilingual in Portuguese/English, with hands-on experience across identity and access management, endpoint management, networking, IT asset management, and Microsoft 365 environments. Fast learner who takes ownership, communicates clearly, and brings a team-oriented mindset with a focus on improving processes and addressing issues proactively.

## WORK EXPERIENCE

### Fisher College IT

#### Help Desk Technician

Boston, MA · Sep 2025 - May 2026

- Served as first point of contact for help desk support requests - troubleshooting end-user hardware, software, network connectivity, and identity/access issues across Windows 10/11 and macOS for 1,000+ students, faculty, and staff, providing complete follow-through to successful resolution.
- Provided first-level technical support via telephone, email, ticketing, in-person, and remote tools - documenting all problems and resolutions in Spiceworks ticketing system, consistently achieving first-contact resolution, and escalating incidents requiring senior IT review.
- Executed account provisioning, password resets, group membership changes, and deprovisioning in Active Directory, Microsoft Entra ID, and Microsoft 365 Admin Center - supporting joiner/mover/leaver workflows and MFA enrollment.
- Set up and configured desktops and laptops; created and maintained Windows 10/11 computer images for 60+ domain-joined endpoints; installed peripheral components and maintained accurate IT asset inventory.
- Hardened Windows endpoints via Microsoft Intune (MDM) and Group Policy - enforcing least-privilege access controls through AppLocker rules, software restrictions, and Windows file permissions to ensure users held only the access required for their roles - alongside endpoint compliance policies and patch compliance tracking across domain-joined PCs.
- Documented troubleshooting steps and issue trends in Spiceworks, informing management of recurring problem trends, created knowledge base articles, mentored and trained 2 interns on IT support workflows, and provided conference room A/V and videoconference administration and support.

#### IT Intern

Boston, MA · Jul 2025 - Sep 2025

- Provided Tier-1 support for hardware, software, and network issues on Windows/macOS workstations using Spiceworks ticketing system and remote support tools; escalated issues requiring senior IT review.
- Performed endpoint migrations, printer and peripheral installs, mobile device and laptop support (including videoconference/AV equipment), and docking station setup; administered user accounts in Active Directory, Azure AD, and Microsoft 365 Admin Center supporting access provisioning.

## CERTIFICATIONS

- CompTIA Network+ (N10-009)
- CCNA: Enterprise Networking, Security, and Automation
- Cisco CCNA - (In Progress)

## PROJECTS

### IT Infrastructure Lab: AD, Intune, Zabbix Monitoring & Server Administration

Dec 2025 - Mar 2026

- Built a Windows Server 2022 environment managing 100+ user accounts across structured OUs - handling full account lifecycle operations including provisioning, permission assignments, group membership, RBAC, and deprovisioning aligned with joiner/mover/leaver workflows.
- Configured Windows Server 2022 as a DNS server - managing forward and reverse lookup zones, and creating A, PTR, SOA, and TXT records - and as a DHCP server with scope configuration, lease management, and static IP reservations; enforced domain-join policies via Group Policy; and integrated on-prem Active Directory with Microsoft Entra ID via Entra Connect for hybrid identity, SSO, and password writeback.
- Enrolled endpoints in Microsoft Intune for hybrid domain join, MDM compliance policies, and least-privilege endpoint hardening; deployed Zabbix as an SNMP manager - installing and configuring SNMP agents on domain-joined Windows machines for host availability, service health, and performance monitoring - and configured syslog collection for centralized event alerting, backup verification, and patch compliance tracking.

### Enterprise Network Lab - Cisco Packet Tracer

Sep 2026 - Present

- Building a multi-site enterprise network simulation in Cisco Packet Tracer - three-tier architecture (core, distribution, access layers) across two offices with redundant uplinks and dual-ISP Internet failover.
- Configuring Layer 2 (VLANs, 802.1Q trunking, EtherChannel, Rapid PVST+), Layer 3 (OSPFv2, HSRP, inter-VLAN routing, NAT/PAT, DHCP relay), network services (SNMP, Syslog, NTP, SSHv2), and access-layer security (Port Security, DHCP Snooping, DAI) - plus centrally managed wireless (WLC/LWAP, WPA2-AES).

## EDUCATION

### B.S., Information Technology, Software Engineering Concentration

May 2026

Fisher College

Boston, MA

- GPA: 3.83
- Achievements: Dean's List, Academic Excellence Award

## TECHNICAL SKILLS

**Help Desk & Support Operations:** Tier-1/Tier-2 help desk & desktop support, escalation & incident resolution, remote support (Quick Assist, RDP), Microsoft Teams, password resets, customer service, documentation, continuous process improvement

**Identity & Access Management:** Active Directory (AD DS), Microsoft Entra ID (Azure AD), Entra Connect (hybrid identity, SSO, password writeback), account/user provisioning & deprovisioning, MFA enrollment, RBAC, IAM, joiner/mover/leaver workflows

**Endpoint Deployment & Management:** Microsoft Intune (MDM), Windows imaging & deployment, Group Policy (GPO/GPP), AppLocker, Jamf, Cisco Meraki MDM (familiar), patch compliance tracking

**Asset Management:** IT asset/inventory tracking, hardware lifecycle management & stock levels, hardware upgrade/replacement coordination, peripheral & equipment management

**Operating Systems:** Windows 10/11, Windows Server 2022 (systems administration), macOS, iOS

**Microsoft 365 & Collaboration:** Microsoft 365/O365 (Exchange Online, OneDrive, SharePoint, Outlook, Word, Excel, PowerPoint, Teams), Microsoft Copilot (familiar), conference room A/V & videoconference support

**Networking:** TCP/IP, DNS, DHCP, IPv4 subnetting, VLANs, Wi-Fi troubleshooting, VPN concepts, switch & router configuration, hybrid on-prem/cloud support, port tracing & patch panel documentation
